

MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

DECEMBER 13, 2005

The Santa Susana Field Laboratory is located in unincorporated West Chatsworth along the border of Los Angeles and Ventura County. Operations at the laboratory contaminated local ground-water. The Boeing Company, which owns the property and operates the Laboratory, has implemented a remediation program that is supervised by appropriate local, State, and Federal regulatory authorities.

A Federal grand jury recently requested documents from the Boeing Company relative to its ground-water remediation and monitoring programs. Residents of the area are concerned about ground-water contamination and deserve to know the status of the remediation and monitoring programs.

I, THEREFORE, MOVE that the Board of Supervisors Direct the:

- Chief Administrative Officer to contact the United States Department of Energy, the State of California Department of Toxic Substances Control, the Los Angeles Regional Water Quality Control Board concerning the status of the ground-water remediation program underway at the Santa Susana Field Laboratory;
- Department of Public Works and Department of Environmental Health to identify the status of their departments' on-going monitoring of ground-water contamination issues at the Santa Susana Field Laboratory;
- Chief Administrative Officer, Department of Public Works, and Department of Environmental Health to report back to the Board of Supervisors within 30 days; and
- Chief Administrative Officer to report his finding and recommendation to the Board of Supervisors within 30 days.
